

"Sustainable Mining: Our Legacy"

Ministry: MINES AND MINING DEVELOPMENT

Strategic Plan 2026-2030

SECTION A: PROFILE OF THE MINISTRY

i) Foreword

The mining sector continues to be a cornerstone of Zimbabwe's economic transformation, contributing significantly to the national Gross Domestic Product (GDP), employment creation and foreign currency earnings. Building on the achievements of the 2021–2025 Strategic Plan, the Ministry now embarks on the 2026-2030 Strategic Plan with renewed focus on aligning sectoral priorities to NDS2.

This Strategic Plan reflects Government's commitment to harnessing mineral resources for inclusive and sustainable development. It underscores the importance of beneficiation and value addition, the operationalisation of a modern mining cadastre system, and the strengthening of legal and regulatory frameworks to ensure transparency, accountability and investor confidence.

The plan also prioritizes capacitation of small-scale miners, resuscitation of closed mines, and promotion of research and development to unlock new opportunities. In addition, it integrates climate change adaptation, environmental stewardship and community empowerment as critical pillars of responsible mining.

As Zimbabwe advances towards Vision 2030, the Ministry of Mines and Mining Development reaffirms its role in driving sectoral transformation, fostering partnerships and ensuring that mineral wealth translates into broad-based prosperity. The Strategic Plan is therefore not only a roadmap for the mining sector but also a national instrument for achieving sustainable growth and empowerment.

Hon. Dr. Eng. P. Kambamura [MP]

Minister of Mines and Mining Development

ii) Executive Summary

The Ministry of Mines and Mining Development's 2026–2030 Strategic Plan sets out a bold roadmap to consolidate the gains of the 2021–2025 plan, while aligning sectoral priorities with the National Development Strategy 2 (NDS2), Vision 2030, Africa Mining Vision, Agenda 2063 and the Sustainable Development Goals (SDGs). Anchored on Vision 2030 of achieving a prosperous and empowered upper middle-income society by 2030, the plan positions the mining sector as a chief cornerstone of Zimbabwe's economic transformation. It emphasizes beneficiation and value addition of key minerals such as gold, Platinum Group Metals (PGMs), diamonds, coal, lithium, chrome and gemstones, while integrating mineral value chains into national re-industrialisation priorities. The plan underscores the importance of macroeconomic stability, predictable fiscal frameworks and investor-friendly reforms to attract foreign direct investment and strengthen domestic participation, while advancing responsible mining practices, climate resilience and community empowerment.

The Strategic Plan integrates the roles of state-owned enterprises such as the Mineral Marketing Corporation of Zimbabwe, Mining Promotion Company, Zimbabwe Mining Development Corporation, Zimbabwe School of Mines and the Institute of Mining Research to ensure that research, marketing, investment, beneficiation and human capital development are aligned to national priorities. The environmental scan highlights strengths such as political will, diverse mineral deposits and a strong geological knowledge base, while acknowledging weaknesses including high costs of doing business, outdated policies and limited uptake of digital technology. Opportunities lie in global demand for energy minerals, beneficiation facilities and technology transfer, while threats include sanctions, global price fluctuations, ecological degradation and rising artisanal mining conflicts.

Strategic programmes focus on governance and administration, mining development and management, environmentally sustainable mining and increased exports of value-added minerals. These programmes are weighted to ensure balanced delivery of improved governance, enhanced mineral output, climate resilience and industrial growth, contributing to national outcomes of inclusive economic growth, environmental sustainability and human capital development. The Ministry's Strategic Plan is firmly embedded in external and internal policy frameworks, including Vision 2030, NDS2, the Africa Mining Vision, SADC Protocol on Mining as well as national mining legislation to ensuring coherence with international best practices and domestic regulatory requirements.

Overly, the 2026–2030 Strategic Plan reaffirms the Ministry's role as a driver of mining governance reforms and sectoral transformation. It seeks to unlock Zimbabwe's mineral wealth through beneficiation, value addition and inclusive participation, while safeguarding environmental sustainability and community empowerment.

iii) Introduction

The Ministry of Mines and Mining Development's 2026 Strategic Plan, aligned to the National Development Strategy 2 (NDS2), consolidates the gains of the reviewed 2021–2025 Strategic Plan while charting a forward-looking path for sustainable mineral development. Anchored in Vision 2030, the Plan seeks to deepen structural transformation of the mining sector through enhanced beneficiation, value addition and integration of mineral value chains into national re-industrialisation priorities.

Key minerals under NDS2 including gold, Platinum Group Metals (PGMs), diamonds, coal, lithium, gemstones and chrome remain central to driving inclusive growth, foreign currency generation as well as industrial competitiveness. The Strategic Plan emphasizes macroeconomic stability, predictable fiscal frameworks and investor-friendly reforms as foundations for attracting Foreign Direct Investment and strengthening domestic participation in the mining sector.

The 2026 Plan advances responsible mining practices, climate resilience and community empowerment, ensuring that mineral wealth contributes to sustainable livelihoods and equitable development. It positions the Ministry as a driver of innovation, governance reform, and sectoral modernization, thereby reinforcing Zimbabwe's Vision 2030: **"Towards a Prosperous and Empowered Upper Middle-Income Society by 2030."**

iv) Background

Zimbabwe is endowed with vast mineral resources which remain largely under-exploited. Beneficiation and value addition of minerals is pivotal to realise growth in output and the mining sector's overall contribution towards sustainable socio-economic development. Beneficiation and value addition will play a central role during NDS2. Key minerals of focus are gold, diamond, platinum group metals, gemstones, chrome and coal.

As Zimbabwe embraced its own currency during the NDS1 tenure and adopted a sound monetary policy, moved towards market-based and competitive pricing; these policies are expected to starve off smuggling of minerals to illegal markets. The contribution of mining and quarrying to GDP rose from 6.7% in 2018 to an estimated 14.5% in 2025, while its share of total export earnings grew from 68% in 2018 to 76% in 2024, underscoring its critical role in sustaining external sector stability and foreign currency generation. Overall, the mining sector grew by an average growth rate of 5.6% in 2025. The growth was driven by key minerals namely gold, Platinum Group Metals (PGMs), diamonds, ferrochrome, coal and lithium.

The Ministry seeks to achieve the following outcomes during the NDS2 period:

i. Improved governance and administration,
ii. Enhanced mining sector growth,
iii. Improved environment protection and
iv. Enhanced mining sector investment climate.

This Strategic Plan was therefore reviewed in alignment with the National Development Strategy 2 (NDS2:2026-2030) towards the overall attainment of a Prosperous and Empowered Upper Middle-Income Society by 2030.

v) National Level Contribution:

a. National Vision: "Towards a Prosperous & Empowered Upper Middle-Income Society by 2030".

b. National Priorities the Ministry is contributing to:

National ref	*NPA/s Name*	*National Key Result Area*	*National Tertiary Outcome/s*	*TOUC Reference*
10	Governance Institutional Building, Peace and Security	Public Service Delivery	Enhanced Inclusive Service Delivery	23
2	Inclusive Economic Growth and Structural Transformation	Inclusive and Sustainable Economic Growth	Enhanced, Inclusive, Equitable and Sustainable Economic Growth	4
4	Agriculture, Food, Climate and Environment	Climate and Environmental Protection	Improved climate Resilience and Environmental Sustainability	10
5	Science, Technology, Digital, Innovation and Human Capital Development	Human Capital Development	Improved access to quality education	13

Sectoral Level Contribution:

c. Sectoral Level

Sector ref	Sector/s Name	Sector Key Result Area	Sector Intermediate Outcome/s	Reference
10	Good Governments	Public Service Delivery	Enhanced Inclusive Governance and Accountability Enhanced transparency and accountability	65 66
1	Economic	Inclusive Economic Growth	Enhanced Industrial Growth	10
8	Food Security, Climate	Environmental Protection	Improved Climate Action	25

	Resilience and Environmental Management			
9	Education	Education and training	Increased availability to specialist skills for industry, commerce and public sector	28

Ministry

1. Ministry of Mines and Mining Development
2. **Vote Number:** 9

3. Vision Statement:

A stable and sustainable mining industry by 2030.

4. Mission Statement:

To promote sustainable and responsible exploration, mineral extraction, beneficiation, value addition and marketing of mineral resources.

5. CORE VALUES:

VALUE	DEFINITION
INTEGRITY	To uphold the highest levels of honesty, transparency, ethical behaviour and accountability in all operations and decisions.
EFFICIENCY	To deliver services in the least turnaround time.

TEAMWORK	To collaborate, offer mutual support and foster an environment where everyone contributes their strengths towards shared goals.
INNOVATIVENESS	To embrace new ideas, technologies and innovative thinking to address challenges and improve the performance of the mining sector.
INCLUSIVITY	To promote respectful, fair and transparent stakeholder engagement to ensure that the needs and concerns of all citizens are considered.
STEWARDSHIP	To ensure responsible management of mineral resources for the long-term including environmental protection and community well-being.

6. TERMS OF REFERENCE:

The full scope, structure and terms of reference that define the purpose and mandate of MMMD are contained in the following legislation, amongst others:

- The Constitution of Zimbabwe No.20 Act of 2013
- Statutory Instrument 206 of 2023
- Mines and Minerals Act [Chapter 21:05]

7. OVERALL FUNCTIONS:

The Ministry of Mines and Mining Development is responsible for:

1. Administering the Mines and Minerals Act [Chapter 21:05] and related mining legislation.
2. Formulating, implementing, monitoring and evaluating mining sector policies and strategies.
3. Developing effective mechanisms for transparent and accountable mineral resource management.
4. Generating and maintaining an up-to-date national geological and mineral information database.
5. Promoting sustainable investment, exploration, beneficiation and value addition across all mineral value chains.
6. Facilitating growth of Artisanal Small-scale Miners (ASM) and Medium-scale Miners.
7. Promoting the participation of indigenous Zimbabweans and disadvantaged groups in mining.
8. Coordinating and supervising mining parastatals in line with the Public Entities Corporate Governance Act.

8. DEPARTMENTS IN THE MINISTRY AND THEIR FUNCTIONS:

A. Zimbabwe Geological Survey (ZGS)

1. Conduct national geological mapping and generate geoscientific information.
2. Maintain and manage the national geological and mineral resource database.
3. Provide technical and advisory services on geology, exploration and mineral potential.
4. Monitor exploration activities and ensure compliance with geological reporting standards.
5. Facilitate analysis and export permits for geological samples.
6. Administer mining titles and licensing processes at Head Office.

B. Metallurgy Department

1. Regulate and monitor mineral processing operations and metallurgical standards.
2. Provide analytical, extractive, physical, ceramic and process metallurgy services.
3. Audit mineral exports to ensure value, grade and quantity compliance.
4. Conduct applied research and promote clean, mercury-free technologies.
5. Monitor environmental compliance within metallurgical operations.

C. Mining Engineering Department

1. Enforce mining, explosives and safety regulations in line with the Explosives Act.
2. Provide technical services in mechanical, electrical, mine surveying and ventilation engineering.
3. Coordinate mine rescue and emergency response services.
4. Conduct statutory competency examinations for mining professionals.
5. Promote safe mining practices through inspections, outreach and technology support.

D. Provincial Mining Offices (PMOs)

1. Administer mining titles, licensing processes and compliance monitoring at provincial level.
2. Facilitate investor support and small-scale, medium scale mining development.
3. Collect employment-related data and maintain provincial mineral production data.
4. Monitor exploration and mining activities within provinces.

E. Non-Energy Minerals Department

1. Facilitate investment promotion, negotiation and due diligence for non-energy minerals.
2. Develop policies and programmes to enhance production across non-energy minerals value chains.
3. Promote formalisation and growth of artisanal and small-scale mining into compliant medium-scale operations.
4. Coordinate bilateral and multilateral engagements related to non-energy minerals.

F. Energy Minerals Department

1. Facilitate investment promotion and partnership structuring for energy minerals.
2. Develop policies and programmes to increase output in the coal, lithium, uranium, oil and gas sectors.
3. Coordinate local, international agreements and strategic partnerships for energy mineral development.
4. Promote sustainable exploitation of energy minerals to support energy security.

G. Research, Value Addition and Beneficiation

1. Coordinate mineral value addition, beneficiation and processing research projects.
2. Consolidate and analyse mineral production statistics
3. Regulate and monitor mineral value addition plants and related facilities.
4. Promote technologies that improve production efficiency and reduce environmental hazards (e.g., mercury abatement).
5. Develop and recommend mineral value addition policies and investment opportunities.

I. Strategic Policy, Planning, Monitoring and Evaluation (SPPME)

1. Lead policy development and strategic planning for the Ministry.
2. Coordinate monitoring and evaluation of Ministry performance.
3. Analyse and synthesise Ministry performance reports to support evidence-based decision-making.
4. Oversee development of integrated plans and M&E systems.
5. Coordinate international cooperation on planning and policy development.

J. Information and Communication Technology (ICT)

1. Manage ICT infrastructure, systems security and network services for the Ministry.
2. Provide ICT support to all departments and provincial offices.
3. Implement and monitor digital systems, including e-Government platforms.
4. Review and enforce ICT policies and standards.
5. Oversee digital information management and dissemination.
6. Digitalization of the Ministry of Mines operating systems

K. Finance and Administration (FA)

1. Mobilise, allocate and manage financial resources in line with Ministry priorities.
2. Maintain budget control, statutory fund management and appropriation accounts.
3. Manage assets, transport, stores and internal controls.
4. Oversee revenue collection and financial reporting.

L. Human Resources (HR)

1. Lead workforce planning, recruitment and staff development.
2. Manage conditions of service, discipline and performance management.
3. Develop and review HR policies, records management and talent development systems.
4. Strengthen organisational culture, service delivery and client satisfaction monitoring.

M. Internal Audit

1. Provide assurance on governance, risk management and internal controls.
2. Conduct financial, compliance and performance audits
3. Promote transparency and good corporate governance.
4. Provide advisory services on processes, systems and risk mitigation.
5. Safeguard Ministry assets through continuous audit and monitoring.

N. Communication, Advocacy and Mining Community Sustainability

1. Develop communication and stakeholder engagement strategies for the mining sector.
2. Coordinate CSR, mining community development and sustainability initiatives.
3. Manage Ministry publicity, media relations and brand positioning.
4. Promote mining investment programmes through targeted communication and information dissemination.
5. Lead community outreach and planning of exhibitions
6. Develop and review client charter implementation.

O. Procurement Management Unit (PMU)

1. Plan, manage and execute procurement in accordance with the PPDPA Act.
2. Prepare bidding documents, oversee bid evaluation and recommend awards.
3. Manage contracts across the Ministry.
4. Provide procurement advisory services and enforce compliance.
5. Prepare periodic procurement reports.

P. Gender Mainstreaming, Inclusivity and Wellness

1. Develop and oversee gender, inclusivity and workplace wellness policies.
2. Provide technical support and capacity building on inclusivity and wellness.
3. Ensure Ministry facilities and services are accessible and inclusive.
4. Promote disability-inclusive programming and employee wellness.
5. Monitor implementation of gender, inclusivity and wellness interventions

9. STATE ENTERPRISES AND PARASTATALS, STATUTORY BODIES AND GRANT AIDED INSTITUTIONS UNDER THE MMMD AND THEIR FUNCTIONS.

State Enterprises and Parastatals	Functions
Institute of Mining Research (IMR)	1. Research on issues pertinent to the Ministry and mining industry, throughout the mining cycle/value chains, 2. Provide laboratory services (assays) to industry and government 3. Provide consultancy services to industry 4. Collect, collate and disseminate information to Government and Industry
Mineral Marketing Corporation of Zimbabwe (MMCZ)	1. Act as the sole Marketing and selling agent for all minerals, except gold and silver. 2. Investigate or cause to be investigated marketing conditions, whether inside or outside Zimbabwe, for minerals in general or for any particular mineral. 3. Purchase and acquire any minerals for its own account and to sell or dispose of such minerals. 4. Minerals resource accounting. 5. Encourage local beneficiation and utilization of any minerals. 6. Advise the Minister on all matters connected with the marketing of minerals. 7. To do all things which by the MMCZ Act or any other enactment are required to be done by the Corporation.
Mining Promotion	1. Prospect, exploration and development work;

Company (MPC)	2. Obtain, analysing and making available information concerning mineral properties and markets for minerals; 3. Carry out research into new or improved processes for the production, extraction or processing of minerals and mineral resources; 4. Promote or participating in mining operations (exploitation) of deposits or occurrences of minerals, mineral oils or natural gases and processing of the products of such operations; 5. Acquire and deal with grants, licenses, concessions, leases, options and rights of all kinds in respect of land supposed to contain minerals, mineral oils or natural gases; 6. Carry out any or all of the businesses of prospecting for mining, treating, refining, processing, or dealing in base minerals, precious metals, precious stones, and mineral substances of all kinds.
Zimbabwe Mining Development Corporation (ZMDC)	1. Invest in the mining industry in Zimbabwe on behalf of the State. 2. Plan, coordinate and implement mining development projects on behalf of the state. 3. Engage in prospecting, exploration, mining and mineral beneficiation programs. 4. Render assistance to persons engaged in and about to engage in mining. 5. Encourage and undertake the formation of mining cooperatives. 6. Advise the Ministry on all matters connected with corporate investments in the mining industry and make recommendations for the proper coordination of all investment programs. 7. Review the general economic conditions and prospects of the mining industry and make

	recommendations for the proper coordination of all investment programmes. 8. Carry out any other functions and duties which may be imposed upon the Corporation by any enactment.
Zimbabwe School of Mines (ZSM)	1. Human Capital Development. 2. Offer technical support services to the mining industry. Mining related Research and Development.

9. ENVIRONMENTAL SCAN

ENVIRONMENTAL SCAN	STRENGTHS	WEAKNESSES	OPPORTUNITIES	THREATS
POLITICAL	-Political will	-Inconsistent government policies	-Potential for regional political co-operation (SADC, Mineral value chain) Political stability	-illegal sanctions -perceived country risk
ECONOMIC	-Local investment in mining -diverse mineral deposits -significant geological	-High cost doing business -reliance on exporting raw material -poor contract	-Increasing global demand for energy minerals -potential for establishment of value addition and	-Global recession -market fluctuation in mineral prices -competition from other mining jurisdictions

	knowledge base -micro-economic stability	negotiation	beneficiation facilities -Potential for Foreign Direct Investment (FDI)	
SOCIAL	-Social stability -employment creation -source of knowledge base	-Displacements and environmental degradations -rising artisanal mining conflicts -Brain drain -poor social corporate responsibility	-room for empowerment of local communities through formalisation of artisanal miners	-Artisanal mining accidents -Perceived social unrest -High unemployment
TECHNOLOGICAL	-valuable geotechnical information and geoscientific data -technically trained professionals	-slow uptake of digital technology -limited and obsolete ICT infrastructure	-huge potential for technology transfer -adoption of digital cadastre system for transparency	-High cost of acquiring new technology -cyber security threats once system has been digitalised
LEGAL	-Established legal framework e.g Mines and Minerals Act -Ongoing legal reforms	-outdated laws	-Adoption of International Best Practice Frameworks e.g ESG	-risk of litigation from communities or investors

ECOLOGICAL	-Existence of environmental laws - Existence of environmental agencies -Zimbabwe signatory to environmental conventions	Environmental degradation -Pollution (emission of mercury and other substances) -Deforestation -Poor compliance level	-Room for green mining -Room for rehabilitation and reclamation	- Lack of commitment to enforcement of bylaws -Climate change affecting operations -Loss of biodiversity and increased human-wildlife conflict
GLOBAL	-Market for energy minerals -High grade minerals	-Limited global market integration due to sanctions -We are price takers	-Room for global best mining practices -Opportunity to re-engage global markets e.g EU	-Global price shocks -Global geo-politics and regulatory uncertainty -Strict global ESG and responsible mining standards

11. MINISTRY PROGRAMMES AND OUTCOMES:

Prog. Ref	Programme Name	Programme Outcome/s	Weight	Responsible Department	Contributing MDAs/ Other Partners	Type of Contribution	Sector Outcome Ref.	National Outcome Ref	SDG Ref
1	Governance and Administration	Improved Governance and Administration	20	HR, FA, IA, ICT, SPPME, LS, CACS	• MOFEDIP • OPC • PSC • Parliament of Zimbabwe • Mining Associations	• Funding • Policy guidance • HR capacity development • Oversight	1	10	8,9, 12, 13,17

Potential Investors	**NEEDS:**	
	1. Clear and consistent policies and legislation	High
	2. Updated mineral resources information	High
	3. Efficient mining title management system	High
	4. Clear procedures for acquiring mining titles/rights	High
	5. Security of tenure	
	6. Competitive tax regime	High
	7. Viable and reasonable fees structure	High
	8. Regional competitiveness in royalty rates	High
	9. Technical services support	High
	10. Ministry visibility and accessibility (signage & website)	High
	11. Ease of doing business	Low
	12. Transparent and anti-corruption measures	Moderate
	13. Modern, accessible mapping systems	High
		High
	PROBLEMS:	High
	1. Outstanding amendment of Mines and Minerals Act	
	2. Old and tattered maps	
	3. Double allocation of claims	High
	4. Processing delays (pre-registration inspections at PMOs, surveyor general backlogs, EPO approvals by MAB)	High
	5. Inadequate information on Ministry website	High
	6. Bureaucratic red tape	High
	7. Regulatory uncertainty	

	8. Non-competitive royalty rates compared to region (10% vs 2-5%) 9. Inconsistent policy environment	Moderate High High High High
Staff	**NEEDS:** 1. Favourable conditions of service 2. Appropriate and adequate tools of trade 3. Effective communication systems 4. Effective process systems 5. Well-defined Standard Operating Procedures (SOPs) 6. Relevant skills development and training 7. Internal incentives 8. Clear documented job descriptions and induction programs 9. Adequate resources and budget allocation	 High High High High High High High High

	10. Advancement and promotional opportunities	High
	PROBLEMS:	High
	1. Inadequate resources and budget	
	2. Late disbursement of funding	
	3. Lack of advancement in promotional opportunities	
	4. Insufficient ministry allocation (US$26M for 2026) affecting service delivery	High
	5. Inability to effectively serve miners and investors	High
		High
		High
		High
Parastatal and State-Owned Enterprises	**NEEDS:**	
	1. Mining information access	Moderate
	2. Regular interaction and communication with ministry	High
	3. Capacitation (funding, corporate governance)	
	4. Technical and operational support	High
	5. Transparent reporting mechanisms	Moderate
		High
	PROBLEMS:	

	1. Political (external) interference	
	2. Delayed budget approvals	High
	3. Operational constraints	High
		High
Custom Millers	**NEEDS:**	
	1. Licensing and approvals (Statement of Work, plant commissioning)	High
	2. Proper log books (custom milling, cyanidation)	
	3. Technical assistance	Moderate
	4. Plant, equipment, and financial support	
	5. Reliable ore supply	Moderate
	6. Stable power supply	High
	7. Clear regulatory framework	High
	PROBLEMS:	High
	1. Inadequate ore supply	High
	2. Proliferation of unregistered hammer mills	
	3. Illegally mined ores contaminating supply chain	High
	4. Erratic power supply affecting operations	High
	5. Unfair competition from illegal operators	High
	6. Operational inefficiencies	
		High
		High
		Moderate

15. STRATEGIES, ASSUMPTIONS, RISKS AND MITIGATIONS

Programme 1: Policy and Administration				
Outcome 1: Improved Governance and Administration				
Period	**Strategies**	**Assumptions**	**Risks**	**Mitigations**
Budget Year 2026	Upskilling and reskilling	Uptake from employees	Skills Flight	Staff bonding Advocate for retention allowances
	Scale up staff recruitment	Treasury concurrence	Unavailability of qualified personnel	Head hunt Conduct Job fair
	Performance Audits	Co-operation from audit clients	Resistance	Continuous engagement
	Stakeholder engagement	Co-operation from stakeholder Adequate ICT reforms	Resistance	Continuous engagement
	Strengthen ICT infrastructure	Departments support data sharing	Systems failures and cyber attacks	Backup and disaster recovery systems Data quality assurance

	Strengthen evidence-based planning		Inadequate data planning	
2027- 2028	Improve crisis communication Strengthen records systems Automate asset tracking Risk based audit planning Implement staff development, gender and wellness programmes Strengthen Financial Oversight	Proactive leadership Records policy remains intact Treasury supports asset acquisition Adequate personnel Stable labour environment Policy remain Stable	Reputational risk Poor records management Weak asset management Inadequate risk coverage Low staff morale and turnover Procurement non compliance	Rapid response protocol Phased digitisation Annual physical verifications Prioritise high risk areas Conduct regular wellness checks Continuous procurement Audits
2029-30	Improve budget prioritisation Strengthen policy development	Treasury maintains fiscal support Government maintains planning framework	Budget cuts and insufficient release Weak policy coherence	Advocate early for critical funding Periodic policy review

	Strengthen Monitoring and Evaluation Systems Automate reporting tools	Departments provide timely data Stable ICT systems	Weak data quality Incomplete reporting	Data quality audits Monthly reporting templates
Programme 2: Mining Development and Management				
Outcome 2: Enhanced Mining Sector Growth				
Budget Year	Accelerate Mineral Exploration	Availability of potential investors Timely processing of EPO applications Capacity to monitor exploration activities	Red tape Litigation by miners and land owners	Establish accountability levels Continuous lobbying of approving authorities for EPOs Enforce standard operating procedures Improve service delivery through Cadastre Enhance monitoring of exploration activities to ensure adherence to project timelines Improve ease of doing business through decentralisation of operations to district levels
	Digitalise Geo-Survey Data	Reliable ICT Infrastructure Data Quality	Cybersecurity Threats Technical System Failures	Data back up and validation

		Stakeholder Buy-In	Skill gap	Cyber security measures Training Programs
	Facilitate expansion of existing Mines	Investor appetite to commit resources to invest Favourable commodity prices	Perceived policy inconsistencies e.g. forex retention	Finalisation of policies and other pieces of legislation Provision of security of (mining title) tenure
	Enhance facilitation in the resuscitation of closed mines	Availability of resources and technical expertise for facilitation Investor appetite to commit resources to invest	Perceived policy inconsistencies e.g. forex retention	Finalisation of policies and other pieces of legislation Provision of security of (mining title) tenure Monitor implementation of Joint Ventures
	Increase capacitation of small-Scale Miners	MILF is capacitated Availability of skills	Delays in disbursement of funding Low uptake of facilities	Prioritisation of the capacitation Awareness campaigns on the facility Continuous engagement of Treasury
	Accelerate Resolution of Mining Disputes	Harmonisation of conflicting policies Cooperation by parties	Lack of cooperation by the disputants	Encourage dialogue between parties Sanctioning of errant CRAP holders Fair hearing
	Improve the Investment Climate and Ease of Doing Business	Stable macroeconomic environment Investor confidence remains positive	Bureaucratic bottlenecks Cadastre system downtime, data inaccuracies	Develop clear, long-term mineral policies and communicate them openly. Introduce fiscal stability clauses to guarantee predictable royalty and tax structures. Fully operationalise the digital cadastre and ensure public visibility of claims.

	Promote Beneficiation and Value Addition	Steady supply of raw minerals to support domestic beneficiation plants. Export Markets for Value-Added Products exist	Power Shortages and High Energy Costs, among other Infrastructure Constraints Skills Shortages	Create Incentive Packages Promote Independent Power Producers (IPPs). Build Technical Skills Capacity
	Promote Public–Private Partnerships and Investment Mobilisation	Mutual Benefits Clear Regulatory Framework (There is an established and transparent legal and regulatory framework to support the formation and functioning of PPPs.)	The public sector may lack the technical expertise or experience necessary to effectively engage in PPPs.	Develop financial models that account for risks, and create contingency plans to manage financial uncertainties. Establish clear performance metrics and monitoring systems to ensure accountability and adaptability throughout the partnership lifecycle.
Outcome 3: Improved Environmental Protection				
Budget Year	Increase mine inspections	Availability of tools of trade Early disbursement of funds	Resistance to compliance	Increase deterrence penalties Incentives
	Upscale the implementation of mercury abatement programmes and research on alternative gold recovery methods	Availability of appropriate alternative to mercury use methods	Lack of uptake of the available appropriate alternative to mercury use methods	Mercury abatement awareness campaigns Capacitation of miners
	Increase SHE awareness campaigns	Uptake by miners Miner turnout	Competing priorities on the funding	Involve development partners
	Enforce environmental Compliance	Availability of effective policies on environmental protection	Stakeholders not willing to partner on environmental issues (cutting corners). Nomadic nature of miners	Engagement of stakeholders Deterrent penalties
Outcome 4: Enhanced Mining Sector Investment Climate				
	Enhance Mineral Exploration	Availability of potential investors	Litigation by miners and land	Enhance monitoring of

2027-2028			owners	exploration activities to ensure adherence to project timelines
	Digitalise Geo-Survey Data	Data Quality	Cybersecurity Threats Technical System Failures	Data back up and validation Cyber security measures
	Facilitate expansion of existing Mines	Favourable commodity prices Availability of Geoscientific Information	Infrastructure Constraints Competing Land Use Claims	Promote Public–Private Partnerships (PPPs) for rail, power lines, water pipelines and road upgrades. Encourage on-site power solutions (solar, gas, captive plants) Promote hedging strategies and long-term offtake agreements. Conduct community mapping and resolve claims before expansions begin.
	Enhance facilitation in the resuscitation of closed mines	Investor appetite to commit resources to invest Closed Mines Still Have Viable Mineral Resources Infrastructure Can Support Reactivation	Uncertain or Inaccurate Resource Estimates High Capital Requirements Old shafts, unsupported stopes and collapsed workings pose significant safety hazards	Digitalise historical geological data to improve accuracy. Use modern geophysical surveys to confirm remaining reserves. Provide incentives such as tax holidays, reduced royalties during the restart phase, and flexible fiscal arrangements.

				Encourage joint ventures and PPP models for high-capital projects. Conduct comprehensive mine safety audits before reopening. Require rehabilitation of shafts and underground workings before production begins. Strengthen enforcement of occupational health and safety standards.
	Increase capacitation of small-Scale Miners	MILF is capacitated Availability of skills	Weak market access Commodity price shocks	Promote transparent pricing and buyer competition. Support cooperative marketing so miners negotiate better prices. Support supply contracts with smelters or large processors.
	Improve the Investment Climate and Ease of Doing Business	Functional and modernised mining cadastre system Investor confidence remains positive	Geopolitical or commodity price shocks Trade restrictions	Promote mineral diversification (lithium, rare earths, PGMs, gold, base metals). Encourage long-term offtake agreements to stabilise demand. Strengthen market intelligence systems.
	Promote Beneficiation and Value	Export Markets for Value-Added	Environmental Compliance Risks	Implement modern emissions

	Addition	Products exist		control technologies. Support compliance through training and monitoring. Offer environmental management incentives.
	Promote Public–Private Partnerships and Investment Mobilisation	Capacity for Collaboration	Complexity in Agreements	Utilize experienced project managers and consultants to guide the development, negotiation and execution of PPP agreements.
Outcome 2: Environmental Protection				
2027 – 2028	Increase mine inspections	Interagency Collaboration	Geographical and Accessibility Challenges	Use drones, GPS mapping, and remote sensing for inaccessible sites. Deploy mobile laboratories for rapid environmental sampling.
	Upscale the implementation of mercury abatement programmes	Strong Policy and Regulatory Support	Resistance from Artisanal Miners Informal or Illegal Mercury Supply Chains Social and Cultural Practices	Enforce border monitoring to block illegal mercury imports. Strengthen licensing and tracking of mercury use in all sectors. Conduct awareness campaigns on health effects of mercury exposure. Promote success stories where mercury-free methods increased gold recovery.
	Increase SHE awareness campaigns	local leadership, radio stations, community forums and mining associations will help disseminate information.	Remote and Hard-to-Reach Mining Areas	Train community-based SHE champions. Develop local trainers within

				mining districts to ensure sustainability.
	Enforce environmental Compliance	Assumes EMA, Ministry of Mines, RDCs, and other regulators have skilled personnel for inspections, audits, monitoring and follow-up.	Low budget for transport, field activities, lab work, or modern monitoring tools. Nomadic nature of miners	Prioritize environmental enforcement in annual budgets. Mobilize support from development partners for equipment, laboratory upgrades and training.
Outcome 1: Enhanced Mining Sector Growth				
2029-2030	Enhance Mineral Exploration	Availability of potential investors	Litigation by miners and land owners	Enhance monitoring of exploration activities to ensure adherence to project timelines
	Digitalise Geo-Survey Data	Data Quality	Cybersecurity Threats Technical System Failures	Data back up and validation Cyber security measures
	Facilitate expansion of existing Mines	Favourable commodity prices Government Support & Coordination	Resource Depletion or Inaccurate Reserve Estimates	Require updated JORC/SAMREC compliant resource statements. Invest in additional drilling and geoscientific surveys.
	Enhance facilitation in the resuscitation of closed mines	Investor appetite to commit resources to invest Digitise historical geological data to improve accuracy.	Uncertain or Inaccurate Resource Estimates High Capital Requirements Old shafts, unsupported stopes and collapsed workings pose significant safety hazards	Use modern geophysical surveys to confirm remaining reserves. Provide incentives such as tax holidays, reduced

				royalties during the restart phase and flexible fiscal arrangements. Encourage joint ventures and PPP models for high-capital projects. Conduct comprehensive mine safety audits before reopening. Require rehabilitation of shafts and underground workings before production begins.
	Increase capacitation of small-Scale Miners	MILF is capacitated Availability of skills	Commodity price shocks	Support cooperative marketing so miners negotiate better prices. Support supply contracts with smelters or large processors.
	Improve the Investment Climate and Ease of Doing Business	Functional and modernised mining cadastre system Investor confidence remains positive	Geopolitical or commodity price shocks Trade restrictions	Promote mineral diversification (lithium, rare earths, PGMs, gold, base metals). Encourage long-term offtake agreements to stabilise demand. Strengthen market intelligence systems.
	Promote Beneficiation and Value Addition	Export Markets for Value-Added Products exist	Environmental Compliance Risks	Implement modern emissions control technologies. Support compliance through training and monitoring.

				Offer environmental management incentives.
	Promote Public–Private Partnerships and Investment Mobilisation	Capacity for Collaboration	Complexity in Agreements	Utilize experienced project managers and consultants to guide the development, negotiation and execution of PPP agreements.
Outcome 2: Improved Environmental Protection				
2029-2030	Increase mine inspections	Interagency Collaboration	Geographical and Accessibility Challenges	Use drones, GPS mapping and remote sensing for inaccessible sites. Deploy mobile laboratories for rapid environmental sampling.
	Upscale the implementation of mercury abatement programmes	Strong Policy and Regulatory Support	Informal or Illegal Mercury Supply Chains	Enforce border monitoring to block illegal mercury imports. Strengthen licensing and tracking of mercury use in all sectors.
	Increase SHE awareness campaigns	local leadership, radio stations, community forums and mining associations will help disseminate information.	Remote and Hard-to-Reach Mining Areas	Train community-based SHE champions. Develop local trainers within mining districts to ensure sustainability.
	Enforce environmental Compliance	Assumes EMA, Ministry of Mines, RDCs, and other regulators have skilled personnel for inspections, audits, monitoring and follow-up.	Low budget for transport, field activities, lab work, or modern monitoring tools. Nomadic nature of miners	Prioritize environmental enforcement in annual budgets. Mobilize support from development partners for equipment, laboratory upgrades and training.

SECTION B: PERFORMANCE FRAMEWORK FOR THE MINISTRY

16. **Programme Performance Framework**

16.a Preliminary Outcome Performance Framework

Ref	Outcome Description	KPI:	Measurement Criterion (time; $;rate; etc)	Baseline		TARGETS									
						2026		2027		2028		2029		2030	
				Year	Value	T	ALV	T	ALV	T	ALV	T	ALV	T	ALV
1	Improved Governance and Administration	Employee Satisfaction Index	Percentage	2025	56	60	+/-1	65	+/-1	75	+/-2	80	+/-2	85	+/-2
		Client Satisfaction Index	Percentage	2025	37	50	+/-1	60	+/-1	65	+/-1	70	+/-2	75	+/-2
		Compliance Level	Percentage	2025	100	100	0	100	0	100	0	100	0	100	0
2	Enhanced mining sector growth	Mining Sector average growth rate	Percentage	2025	5.3	5.7	+/-0.57	5.9	+/-0.59	6.3	+/-0.63	6.5	+/-0.65	6.9	+/-0.69
