

Dr. Eng. Caleb Makwiranzou

Deputy Minister of Mines and Mining Development

Republic of Zimbabwe

Dr. Eng. Caleb Makwiranzou is the Deputy Minister of Mines and Mining Development responsible for Oil, Gas, Lithium, Uranium, Vanadium, and other strategic energy minerals, as well as geological survey, exploration, research, and mineral marketing.

A highly accomplished engineer, academic, and public servant, Dr. Eng. Makwiranzou brings more than 30 years of experience in engineering design, infrastructure development, project management, and public sector leadership.

He holds a Bachelor of Science Degree in Civil Engineering from Aligarh Muslim University in India, a Master of Technology Degree in Soil Mechanics and Foundations from the Indian Institute of Technology (IIT Delhi), an MBA in Finance from the University of Zimbabwe, and a Doctorate in Business Management (Engineering) from the University of Liverpool.

Dr. Eng. Makwiranzou is a Chartered Engineer and Fellow of the Zimbabwe Institution of Engineers, where he previously served as President. He has also held several governance and leadership positions in academia, infrastructure development, and financial institutions.

Throughout his distinguished career, he has led and contributed to major infrastructure, transport, housing, water, and mining-related projects across Zimbabwe and the region. He also serves as a Member of Parliament and has contributed to key parliamentary portfolio committees including Transport and Infrastructure, Defence and Home Affairs, and Foreign Affairs and International Trade.

As Deputy Minister, Dr. Eng. Makwiranzou is committed to advancing Zimbabwe's mineral value addition agenda, promoting strategic mineral exploration, and supporting sustainable growth within the mining sector.
